BACHEM

BELLA'S FIRST BIKE RIDE

WE ARE
HERE

Innovation that transforms lives

Two years ago, Bella's granddad was diagnosed with a life-threatening disease. Now balance has been restored to his life.

At BACHEM, we see oligonucleotides as a novel and emerging class of compounds that can address diseases that were previously considered untreatable. It's why BACHEM is fully committed to the potential of oligonucleotide-based treatments, to help many more patients like Bella's granddad.

Part of our journey is to continue pioneering manufacturing technologies to help meet larger patient populations and indications.

Collaborate with Swiss Biotech

Switzerland enjoys a great biotech ecosystem populated with leading academic institutions and hospitals, and a diverse talent pool of experienced pharma and biotech scientists and executives. This nurtures and supports many successful start-ups and established biotech companies. As of the beginning of 2022, the Swiss biotech hub comprises more than 1,000 biotech companies, creating more than 50,000 high-quality jobs.

The Swiss Biotech Association supports this industry and its members by:

- ▶ developing favorable and competitive framework conditions
- ▶ attracting talent and financial resources
- ▶ fostering networking through strategic national and international partnerships
- ▶ promoting the industry's accomplishments and contributions

The 2022 edition of the Swiss Biotech Directory supports all of these objectives. By providing an overview of the Swiss biotech stakeholders, we offer insight, facilitate access to Swiss biotech companies, and aim at fostering international collaborations. At the same time, this directory will serve as a valuable summary for international talent, biotech investors and pharma partners interested in learning more about the Swiss biotech ecosystem.

The Swiss Biotech Directory is constantly updated and enlarged. It is available online at swissbiotech.org/companies. We encourage you to provide us with feedback as to what you find useful and what we might add, improve or update. Promoting the directory by linking to it from your digital channels or referring to it in your publications is highly appreciated.

Sincerely yours,

Dominik Escher
President

Michael Altorfer
CEO

Based on the digital version, it provides a yearly, handy overview of Swiss companies active in biotechnology and related fields.

The digital Swiss Biotech Directory

Members of the Swiss Biotech Association are entitled to present more information than non-members, and benefit from attractive additional promotion opportunities. Have a look at swissbiotech.org/welcome.

World-leading biotech hub

- ▶ Attractive and reliable framework conditions
- ▶ Stable political environment
- ▶ Strong intellectual property protection
- ▶ Renowned universities
- ▶ Highly-qualified workforce
- ▶ Excellent R&D infrastructure
- ▶ Beneficial funding environment
- ▶ Superb quality of life

A vibrant, densely populated and comprehensive biotech hub

The Swiss Biotech Directory lists more than 1,000 companies, reflecting both the rapid growth, as well as the diversity of this economic sector. The Swiss biotech industry has built one of the most densely populated and comprehensive biotech ecosystems worldwide.

Highly specialized clinical research organizations, manufacturers, suppliers and technical consultants complement, support, and advice biotech companies which focus on the development of their proprietary product pipelines.

Many of the globally leading CROs and suppliers have selected Switzerland as their international headquarter, and Swiss biotech companies

benefit from the proximity of Roche and Novartis and numerous international pharma companies. Increasingly, international companies select Switzerland as their hub for the production of highly complex biologics, peptides and cell products. International investors and industry specialists alike, value the numerous advantages Switzerland offers.

Qualified workforce and high quality of life

The World Intellectual Property Organization's Global Innovation Index and IMD's World Competitiveness Ranking are widely regarded as impartial to compare the competitiveness of countries. They rank Switzerland as world's most-innovative economy in 2021.

Furthermore, the Heritage Foundation's Index of Economic Freedom lists Switzerland as one of the leading countries with regard to its education system, innovation power, political stability, quality of workforce, public services, infrastructure, and its global trade network and strong financial market.

However, two factors typically stand out where Switzerland is right at the top of the league:

- ▶ Highest attractiveness to highly skilled workforce
- ▶ Best quality of life

If you are interested in learning more about the development and competitiveness of the Swiss biotech industry, please refer to our annual Swiss Biotech Report at [swissbiotech.org/report](https://www.swissbiotech.org/report).

Swiss Biotech Ventures platform

2021, the unique Swiss Biotech Ventures platform was successfully launched at the Swiss Biotech Day, facilitating the funding, partnering, and licensing between biotech companies, investors, and pharma companies. SWISS BIOTECH SUCCESS STORIES

Celebrating and honoring major achievements

Swiss Biotech Success Stories demonstrate the power and potential of the industry

The Swiss Biotech Success Stories Awards recognize valuable accomplishments and honor those who have made important and sustainable contributions to the biotech industry in Switzerland. The awards are presented each year at the Swiss Biotech Day and reflect the diversity and achievements of this innovative sector.

Switzerland is one of the world's leading biotech hubs and attracts many foreign companies, specialists and investors. It provides over 50,000 jobs and, together with the pharmaceutical and chemical industries, accounts for almost half of Swiss exports.

To make the industry's impact more visible, the Swiss Biotech Success Stories initiative was launched in 2018. Selected success stories are showcased to illustrate how Swiss biotech companies help patients, improve health care worldwide, and make a valuable and significant contribution to the Swiss and global economy.

Laureates are individuals or groups who have earned extraordinary merits. Success is broadly defined as scientific, translational,

medical or commercial, together with other aspects that have a positive impact on the biotech and life science industry and society in Switzerland.

"It is essential to share with the public the importance and success factors of biotech companies and ensure that decision-makers understand what it takes for the industry to develop and remain competitive," says Michael Altorfer, CEO of the Swiss Biotech Association. "Young talent should be inspired and motivated to take a closer look at the great variety of career profiles in biotech."

12 success categories

- ▶ Completed achievement with lasting impact
- ▶ Scientific breakthrough
- ▶ New technology
- ▶ Strong impact on society
- ▶ Product approval and sustainable revenues
- ▶ Important IP, innovative deal-making, acquisition
- ▶ Involvement of one or more Swiss citizens
- ▶ Swiss-based company / institution
- ▶ Creation of jobs in Switzerland
- ▶ Other aspect with a direct link to Switzerland
- ▶ Enabler for the biotech industry
- ▶ Swissness: Think global, made in Switzerland

SWISS BIOTECH SUCCESS STORIES

Celebrating and honoring major achievements

Open up your network

To ensure that the Swiss Biotech Success Stories will be visible around the globe in many locations, media and events, help us with your network and distribution power.

Let us know if you have contacts in your network who could benefit from the insight into Swiss Biotech Success Stories, and are curious to learn more about the stunning accomplishments of entrepreneurs in this competitive industry.

Interested parties could be: Your customers, suppliers, partners, a journalist, an investor, your company's communication unit, your follower base on social media, your favorite politician, an event platform dedicated to life science, your rotary club colleagues or any other possibility, that could help to promote these success stories.

Share with us your suggestions for spreading the word by e-mail to success@swissbiotech.org or use the QR code to get to our online form.

Organized by:

SWISS BIOTECH SUCCESS STORIES

Award winners 2019

- ▶ Headquartered in Zug, Biogen has been a key stimulus and model for the biotech industry. Its best-selling drug for multiple sclerosis or its Alzheimer's candidate, as well as the new production facilities in Luterbach, creating 600 new jobs, are proof of Biogen's success.

- ▶ The Schlieren-based company is an integral part of Roche Pharmaceutical Research and Early Development since 2005, and a pioneer in antibody engineering in cancer immunotherapy. Its antibody glycosylation technology increases immune-mediated cancer cell killing and builds the basis for improved cancer medicines.

- ▶ Fully integrated into GlaxoSmithKline since 2013, Okairos from Basel developed innovative T-cell based vaccines for major infectious diseases such as malaria, hepatitis C, HIV, and Ebola. Its novel replication-incompetent adenovirus vectors could enable the development of important new vaccines and offer immunizations against illnesses that lack vaccines.

- ▶ The advanced technologies in protein expression by Selexis provide biotech and pharmaceutical companies a rapid, stable, and cost-effective solution for the production of recombinant proteins. Nearly a hundred drug candidates in clinical development and three commercial products utilize the technologies of the Plan-les-Quates-based company.

- ▶ This transformational joint venture provides Vifor Pharma direct access to dialysis patients, facilitating the product distribution and recruitment for clinical development. It transformed the company from Glattbrugg rapidly into a global nephrology corporation. Such vertical integration is a role model for the convergence of different life science sectors.

Award winners 2020

- ▶ Headquartered in Allschwil, Actelion is part of the Johnson & Johnson Family of Companies. Its ground-breaking research and medicines have been a key contributor to improve the lives of people affected by pulmonary hypertension, and made Actelion an industry leader in this area.

- ▶ Family-owned Debiopharm from Lausanne, identifies high-potential compounds in oncology and for the treatment of bacterial infections. They are tested in clinical development and licensed to business partners globally. Over a million patients benefit from their therapies every year.

- ▶ Helsinn, an important employer in Ticino, has a broad portfolio of marketed cancer care products and a deep development pipeline. It has built significant R&D and manufacturing capacities, also advances patient care and supports healthcare innovation with its investment fund.

- ▶ The trio of foundations has been supporting biotech startups with great success for more than 10 years, thereby making a significant contribution to the growth of the Swiss biotech industry. They share the nomination for the Swiss Biotech Success Stories Award.

Werner Arber

- ▶ Werner Arber, Swiss microbiologist and geneticist, won the 1978 Nobel Prize in Physiology or Medicine for his discovery of restriction endonucleases. His groundbreaking research in the field of molecular genetics was instrumental in the development of biotechnology.

SWISS BIOTECH SUCCESS STORIES

Award winners 2021

BACHEM

- ▶ Bachem is a leading manufacturer of peptides and oligonucleotides. The company has grown over 50% in the last five years and now offers more than 5,500 different biologically active peptides amino acid derivatives and oligonucleotides. Its investment plans call for the investment of over USD 400M to continue to pursue its growth strategy.

- ▶ Basilea Pharmaceutica is a leader in targeted oncology small molecules, novel antibiotics and antifungals. Since its listing in 2004 (SIX: BSLN), Basilea has launched two anti-infective treatments: Cresemba (isavuconazole) for invasive fungal infections and Zevtera (ceftobiprole), an antibiotic for severe hospital bacterial infections.

- ▶ ESBATEch, now a Novartis company, is recognized for its pioneering role in developing single-chain antibody fragments for ophthalmic indications. The most advanced product from the ESBATEch platform received market approval by the FDA in October 2019 and shortly thereafter in all major markets.

Lonza

- ▶ Lonza is a global leader in contract development and manufacturing services with strong R&D capabilities and world-class facilities across five continents. In 2020, Lonza supported more than 820 pre-clinical and clinical small and large molecules, more than 245 commercial small and large molecules and produced 230 billion capsules.

- ▶ Founded by the renowned immunologist, Professor Bernard Mach MD PhD, privately-owned Novimmune is a leading light in the discovery and development of fully-human, antibody-based drugs used to fight autoimmune and inflammatory diseases and cancer.

SWISS BIOTECH SUCCESS STORIES

Award winner 2022

Etienne Jornod

Etienne Jornod spent his entire career at Vifor-Galenica Group where he was Executive Chairman until early 2020. Since October 2020, he is Executive Chairman and Co-Owner of OM Pharma.

Trust is the basis of any collaboration, therefore of any project
Performance & Deliver what we promise creates trust
To succeed we must be honest, transparent and love people

VIFOR
PHARMA

Revolutionizing Iron Sucrose

The development of an injectable medication to treat iron deficiency anemia in patients with chronic kidney disease marked the beginning of Etienne Jornod's entrepreneurial success at Vifor Pharma.

Developing Ferric Carboxymaltose

This iron success was followed by the development of a novel iron complex, enabling controlled delivery of iron to target tissues throughout the body.

VIFOR FRESENIUS MEDICAL CARE
RENAL PHARMA

This Joint Venture with Fresenius-FMC, in which Etienne Jornod was extensively involved, resulted in the successful launch of Mircera® in the US in partnership with Roche, and has attracted new licensed products in the field of dialysis: Rayaldee®, Tavneos®, Kapruvia®, Vadadustat®.

Success Categories

- ★ Completed achievement with lasting impact
- ★ Product approval and sustainable revenues
- ★ Involvement of one or more Swiss citizen
- ★ Swiss-based company/institution

Transitioning to OM Pharma

When Etienne Jornod decided to leave, Vifor-Galenica Group has been able to deliver 25 consecutive times a double-digit growth in net profit and increase the value of its share from CHF 3.40 to CHF 185.25, with a total value increasing from MCHF 220 to MCHF 1,200 from 1995 to 2019.

During his tenure, the company has improved the lives of millions of patients and created thousands of jobs.

Who is OM Pharma

OM Pharma is a global biopharmaceutical company, leader in the prevention of recurrent respiratory and urinary tract infections. In October 2020, Etienne Jornod bought it from Vifor Pharma with his friends.

Its leading products Broncho-Vaxom® and Uro-Vaxom® are bacterial lysates, composed respectively of 21 and 18 pathogen bacterial strains. Manufactured in Geneva, they are distributed in more than 100 countries across the world, via an established, international network of partners.

OM Pharma employs around 450 people globally and has a strong presence in Switzerland, with 350 people in Geneva (Global headquarters & biotech center).

The New OM Pharma's Vision

With the New OM Pharma project, Etienne Jornod aims to create a very innovative biopharmaceutical company based on the unique bacterial lysate expertise developed over decades by OM Pharma.

Encompassing seven projects, the goal of improving patients' lives is central to the development of new medicines for asthma, atopic dermatitis, wheezing and other diseases of the respiratory and urinary systems.

Knowledge & Research

High levels of biotech knowledge and experienced teams with substantial know-how in the manufacturing of immunomodulators based on active bacteria.

Innovative scientific research aiming at extending the use of bacterial lysates for the prevention and treatment of a wide range of auto-inflammatory diseases, as well as development of new chemical entities.

SWISS BIOTECH SUCCESS STORIES

Award winner 2022

Genedata is the globally leading provider of enterprise software for digitalizing data-rich and complex biopharmaceutical R&D processes. Incorporating extensive biopharma R&D domain knowledge, Genedata software helps biopharmaceutical organizations to streamline workflows, increase research automation, improve experimental data quality, and maximize the ROI in R&D expenditure, which results in innovative biotherapeutics reaching patients faster.

Founded in 1997 by Othmar Pfannes, Ph.D., Genedata is privately owned and headquartered in Basel, Switzerland. Organic growth and a strong commitment to its employees are the cornerstones of Genedata's 25-year history.

With more than 300 employees and offices strategically located throughout Europe, the USA, and Asia, Genedata works closely with global industry leaders to help them deliver innovative biotherapeutics, vaccines, and cell & gene therapies to patients more efficiently.

Today, over 200 R&D institutions rely on the Genedata Biopharma Platform, including all top-25 biopharma companies worldwide.

Knowledge

- ▶ Experienced Global Market Leader – Established in 1997 & privately owned with +300 people in Basel, Boston, London, Munich, San Francisco, Singapore, and Tokyo
- ▶ Innovative Enterprise Platform – Scalable and open built-for-purpose E2E platform; streamlines and automates data-rich & complex R&D processes out-of-the-box
- ▶ Unique Domain Expertise – In-depth biopharma R&D knowledge ensures delivery of integrated solutions aligned with industry best practices
- ▶ Marquee Customer Base – Increasing R&D efficiency and driving innovation with biopharma R&D leaders around the globe via long-term relationships
- ▶ Successful Partnerships Worldwide – Flexible and collaborative business model accelerates digital transformation to maximize ROI

Organized by
**Swiss Biotech
Association**

The Swiss Biotech Association

Founded in 1998, the Swiss Biotech Association represents the interests of the Swiss biotech industry. To support its members in a competitive market, the Swiss Biotech Association works to secure favorable framework conditions and facilitate access

to talents, novel technologies and financial resources. To strengthen and promote the Swiss biotech industry, the Swiss Biotech Association collaborates with numerous partners and life science clusters globally under the brand Swiss Biotech™.

Our mission

The Swiss Biotech Association is a non-profit, member-driven organization representing the interests of the Swiss biotech industry. Swiss biotech companies are leading the way in developing and commercializing innovative medicines, diagnostics, health-care treatments, services and enabling technologies.

Our core objective is to ensure that the value generated by the Swiss biotech industry continues to grow and that the industry contributes to the well-being of the socio-economic ecosystem thereby enabling Switzerland to be a key player at the forefront of bioscience innovation. To this end, the Swiss Biotech Association is dedicated to supporting Swiss biotech companies through the following:

Developing favorable and competitive framework conditions

- ▶ Creating awareness of the biotech industry's needs and interests with policy makers
- ▶ Advocating a competitive tax system alongside lean and pragmatic regulations
- ▶ Fostering life science education, technology transfer and intellectual property

Attracting talent, know-how and financial resources to drive innovation and growth

- ▶ Promoting and facilitating access to funding opportunities
- ▶ Connecting investors and attractive biotech investment opportunities
- ▶ Facilitating access to national and international talent

Fostering networking through strategic, national and international partnerships

- ▶ Connecting industry stakeholders and life science clusters
- ▶ Organizing and co-promoting national and international life science events
- ▶ Providing access to privileged information through industry platforms and working groups

Promoting the accomplishments of the Swiss biotech industry

- ▶ Disseminating the value-creation of Swiss biotech companies
- ▶ Visualizing the diversity and competitiveness of Swiss biotech companies
- ▶ Presenting innovative products and technologies and their contribution to quality of life

SWISS BIOTECH™

- Broaden your network, meet peers and investors
- Increase your impact and visibility
- Secure significant cost savings
- Capture new business and attract talent
- Unite with fellow members to strengthen the Swiss biotech hub

Araris Biotech AG

Private company, founded 2019

Member Swiss Biotech Association

Araris Biotech AG is a spin-off company from the Paul Scherrer Institute (PSI) and ETH Zurich focusing on the commercialization of a novel antibody-drug conjugate (ADC)-linker technology. Araris' innovative platform allows for the attachment of any payload to 'off the shelf' antibodies without the need of prior antibody engineering in one-step. The resulting ADCs have a well-defined drug-to-antibody ratio, are stable and monomeric. All these favorable properties contribute to the high efficacy, stability and low level of toxicity observed so far. In summary, the straightforward drug conjugation, versatility of the technology and high in vivo efficacy enable the generation of ADC compounds for the treatment of patients with a high unmet medical need.

Avrion Therapeutics

Avrion Therapeutics AG

Private company, founded 2020
Member Swiss Biotech Association
Avrion Therapeutics is a spin-off from EPFL developing AAV-based precision gene therapies for neurological disorders. Based on 10+ years of research at the Brain Mind Institute, we design cell-type specific gene therapy vectors, and identify novel targets using a proprietary discovery engine.
Key business: R&D
Core competencies: Therapeutics/vaccines (human)
Products, services, technology
Bicistronic AAV vector tailored to selectively express therapeutic genes in neurons & astrocytes, to maximize efficacy & reduce risks of side effects. Avrion further develops this vector technology with a potent discovery engine to identify innovative therapeutic targets for neurological disorders.

BISC Global GmbH

Private company, founded 2017

Member Swiss Biotech Association

Founded in 2017 BISC Global has grown to be a Top 10 Bioinformatics Consulting and Services Firm supporting world's leading pharmaceutical and biotech companies. Through our offices in Ghent, Belgium; Basel, Switzerland; Boston, MA; and San Francisco, CA; BISC Global provides data-analytics, custom tool/pipeline development, and cloud solutions delivered on-site or remotely.

Key business: R&D, Sales & marketing (of own products), Service provider

Core competencies: Bioinformatics, Consulting, Project & process management

Products, services, technology

BISC Global offers off- and on-site bioinformatic support typically for following types of projects:

Genomics, Single Cell & Transcriptomics, Metabolomics, Metagenomics, Proteomics, Epigenomics

Machine Learning, Systems Biology, Immunomics, Antibody Discovery

Database automation & Cloud Solutions

BISC Global also offers simplified Bioinformatics by online

automated pipelines for: Transcriptomics, Genomics, Immunopertore analysis

DrM, Dr. Mueller AG

Private company, founded 1982

Member Swiss Biotech Association

DrM is a privately held company managed by highly trained technical professionals with its headquarters in Maennedorf, Switzerland. We develop, design and fabricate filtration systems for solid/

liquid separation in the processing industries as well as vibratory mixers and single-use technologies.

Key business: Supplier

Core competencies: Contract manufacturing, Laboratory equipment & devices, Production equipment

Products, services, technology

Single-Use Filters: drastically reduces your operating costs and extends the lifetime of your subsequent DSP equipment.

Single-Use Mixers: with its proven vibratory mixing technology, which provides a high mixing efficiency at low shear forces and low energy consumption.

Single-Use Pinch Valve

IBR Inc., Institute for Biopharmaceutical Research

Private company, founded 1998

Member Swiss Biotech Association

IBR Inc. is a GxP-compliant CRO offering advanced bioanalytical services for pre-clinical and clinical development of antibodies, biologics, biosimilars, antibody-drug conjugates and vaccines. The services include bioanalytics for product release under GMP.

Key business: R&D, Service provider

Core competencies: Analytical tests & screening, Cell culture, cell technology, Consulting, Contract R&D, Services

Products, services, technology

IBR Inc. service portfolio includes studies on cytokines, chemokines and other biomarkers, pharmacokinetics, cellular immunology, drug/target binding and immunogenicity. Furthermore, we perform cell-based assays with a broad variety of readouts.

Witec AG

Industriestrasse 12, 6210 Sursee

www.witec.ch

WuXi AppTec

Public company

Member Swiss Biotech Association

J WuXi AppTec is a full-service provider of open-access capabilities and technology that enable customers worldwide to advance discoveries in the health sciences and deliver treatment to those in need.

Key business: R&D, Service provider, Supplier

Core competencies: Analytical tests & screening, Cell culture, cell technology, Contract manufacturing, Contract R&D, Medical devices/technologies

Employees in Switzerland: 1-9

Waigaoqiao Free Trade Zone, 288 Fute Zhong Road, Pudong, Shanghai, China, 200131

Wyss Zurich

Other, founded 2015

Member Swiss Biotech Association

R Wyss Zurich is a joint accelerator of ETH & University of Zurich. Our mission is to drive the clinical translation of outstanding scientific discoveries into new therapies for patients and innovations in the fields of regenerative medicine and robotics, and hybrid technologies in these fields.

Key business: R&D

Core competencies: Business development & strategy, Medical devices/technologies, Platform technologies, Project & process management

Employees in Biotech: 50-149

Weinbergstrasse 35, WEH, 8092 Zurich

+41 44 633 89 79

info@wysszurich.ch

www.wysszurich.uzh.ch

Contact: Cathrin Gutwald

Xcenda Switzerland GmbH

Public company, founded 2015

Member Swiss Biotech Association

For over 25 years, Xcenda's leading team of ca. 750 experts worldwide transforms evidence, policy insights, and market intelligence into effective global market access strategies in assisting our biopharma & medtech clients across the portfolio.

Key business: R&D, Service provider

Core competencies: Business development & strategy, Consulting, Contract R&D, Project & process management

Employees in Biotech: 1-9

Bogenshüttenstrasse 9A, Bern

+41789493244

XOventure GmbH

Private company

XOventure portfolio: Rigi Care, research & consulting in Traditional, Modern & Future medicine; 3Brain.com, a leader in brain-computer interface; ViroGates.com, the first biomarker for ER patient triaging; RetiPharma.com, degenerative eye disorders; Bio-Me.no, microbiome test within 24-hours

Key business: Financial investor

Core competencies: Financial & legal services

Employees in Biotech: 1-9

Obstbaumstrasse 31, 6353 Weggis

www.xoventure.com

Xsensio SA

Private company, founded 2014

Xsensio develops the unique Lab-on-Skin™ sensing platform to sense in real-time biochemical information at the surface of the skin, providing unprecedented real-time information about our health and wellness, in a simple and non-invasive way.

Key business: Production (of own products), R&D, Sales & marketing (of own products)

Core competencies: Biochip/biosensors, Bioinformatics, Diagnostics, Medical devices/technologies, Platform technologies

Employees in Biotech: 1-9

EPFL Innovation Park, Building C, EPFL Innovation Park, 1015 Lausanne

www.xsensio.com

YAFO Capital (Shanghai) Co. Ltd

Private company, founded 2013

Member Swiss Biotech Association

YAFO Life Science (YLS) is the healthcare division of YAFO Capital, which is focused on helping leading U.S. and European biopharma and MedTech companies to successfully enter the Asian market, especially in China and Japan.

Key business: Service provider

Core competencies: Business development & strategy, Consulting, Financial & legal services

2F, 1305 South Suzhou Road, Huangpu, Shanghai, China

ZEISS AG

Public company, founded 1846

Since 1846 ZEISS Microscopy is the world's only one-stop manufacturer of light, electron, X-ray and ion microscope systems. Innovative solutions for correlative microscopy connect the different areas of microscopy. ZEISS in Switzerland is offering services on site.

Key business: Supplier

Core competencies: Cell culture, cell technology, Laboratory equipment & devices

Employees in Biotech: 50-149

Feldbachstrasse 81, 8634 Hombrechtikon

www.zeiss.ch/mikroskopie

Zenith Technologies

Public company, founded 1998

Zenith Technologies – a Cognizant Company transforms Life Sciences manufacturing with a focus on delivering speed to value. We provide scalable IT & OT end-to-end smart factory solutions, from conception through completion, across the manufacturing lifecycle.

Zeta CH AG

Public company, founded 1989

Member Swiss Biotech Association

One-stop shop for the pharma and biotech industry. The ZETA Group, with 900 highly qualified employees and 14 subsidiaries worldwide, specializes in the design, manufacturing, automation, digitalization, and qualification of customized biopharmaceutical facilities for aseptic process solutions.

Key business: R&D, Service provider, Supplier

Core competencies: Business development & strategy, Cell culture, cell technology, Consulting, Production equipment, Project & process management, Services, Therapeutics/vaccines (veterinary)

Products, services, technology

Biopharmaceutical active ingredients, such as anti-cancer drugs or vaccines are produced in these "tailor-made" facilities. ZETA supports its customers along the entire drug development and manufacturing pathway with sophisticated solutions from laboratory to industrial production scale.

Employees in Biotech: 1-9

ZueriS GmbH

Other, founded 2009

We provide the chance to start ups to grow by offering space in a building up to 1300 m2 as well as personnel for production process for chemicals and pharmaceuticals. We can also help with fund raising and direct investment.

Key business: Distributor, Financial investor, Service provider

Core competencies: Business development & strategy, Financial & legal services, Project & process management

Employees in Biotech: 1-9

Josefstrasse 92, 8005 Zürich
www.zueris.net

Zühlke Engineering AG

Private company, founded 1968

As a Partner for business innovation, Zühlke develops products, services and new business models including sophisticated health tech solutions. We inspire our customers with outstanding interdisciplinary solutions in the fields of medical devices, IVD and eHealth.

Key business: R&D, Service provider

Core competencies: Business development & strategy, Con-

sulting, Contract R&D, Project & process management, Training & recruiting

Swiss biotech industry: Development, trends, innovations

The Swiss Biotech Report 2022 sheds light on the most important trends, factors and sources of innovation, and summarizes the development of the Swiss biotech industry. Check it out at swissbiotech.org/report

YOUR CRO: FLEXIBLE EXPERTS AND RELIABLE SOLUTIONS.

- ▶ Customized conduct of clinical trials for biotech and medical device companies
- ▶ Highest quality standards, accompanied by frequent and clear communication
- ▶ Combined know-how in all major indications through our 190+ in-house experts in Europe

fgk-cro.com

▶ **FGK Clinical Research GmbH** is a Europe-based full service CRO providing small to mid-sized biotechnology, pharmaceutical and medical device companies with a full range of clinical development services. Since our foundation in 2002, we have performed a large number of international studies in all clinical phases. With efficient processes and flat hierarchies, we can guarantee the sponsor a personal service throughout a project and beyond.

Owned and managed by:

Dipl.-Stat. Martin Krauss

Advanced Cell Culture Solutions

for research and
industrial applications.

We are your partner for:

- Fully defined mammalian Cell Culture Media
- Custom-made liquid and powder solutions for pharmaceutical use
- Classical Cell Culture Media
