

# Swiss Biotech Orbit

## The job platform to match talents and opportunities

The ongoing conflict in Ukraine impacts millions of people. Since the start of the war, more than 60,000 refugees from the Ukraine have fled to Switzerland. Many of them are looking for temporary professional opportunities in our country.

### A pilot project to offer support

In September 2022, with the support of People-Analytix the Swiss Biotech Association launched a pilot project to offer support to Ukrainian citizens and other nationalities **eligible for protection status S** in Switzerland.

Through its digital platform, The Swiss Biotech Association helps to identify suitable job opportunities for professionals with a background in life sciences R&D impacted by the conflict in the Ukraine, so they can continue their professional careers and support their families.

### How to get involved

- ▶ Should you identify any potential job opportunities within your company, you can simply post those openings on the Swiss Biotech Orbit platform.
- ▶ If there are talents that match the skill set you are looking for, the platform will provide you with their contact details, and you can reach out to the respective refugee directly.

[Join the Swiss Biotech Orbit](#)

This initiative can only be successful with the support of members and other stakeholders in the Swiss biotech industry. Please join the initiative to collectively help many displaced refugees to find work and contribute to the growth of the life science industry in Switzerland.
