Collaborate with Swiss Biotech

Switzerland enjoys a great biotech ecosystem populated with leading academic institutions and hospitals, and a diverse talent pool of experienced pharma and biotech scientists and executives. This nurtures and supports many successful start-ups and established biotech companies. As of the beginning of 2025, the Swiss biotech hub comprises more than 1,500 biotech companies, creating more than 60,000 high-quality jobs.

The Swiss Biotech Association supports this industry and its members by:

- ▶ developing favorable and competitive framework conditions
- ▶ attracting talent and financial resources
- ▶ fostering networking through strategic national and international partnerships
- ▶ promoting the industry's accomplishments and contributions

The 2025 edition of the Swiss Biotech Directory supports all of these objectives. By providing an overview of the Swiss biotech stakeholders, we offer insight, facilitate access to Swiss biotech companies, and aim at fostering international collaborations. At the same time, this directory will serve as a valuable summary for international talent, biotech investors and Swiss biotech ecosystem.

The Swiss Biotech Directory is constantly updated and enlarged. It is available online (just scan the QR code on the next page).

We encourage you to provide us with feedback as to what you find useful and what we might add, improve or update. Promoting the directory by linking to it from your digital channels or referring to it in your publications is highly appreciated.

Sincerely yours,

Patrick Amstutz
President

Michael Altorfer
CEO

The Swiss Biotech Directory

The Swiss Biotech Association has been publishing the most comprehensive compendium of the Swiss biotech industry for more than a decade.

Based on the digital version, it provides a yearly, handy overview of Swiss companies active in biotechnology and related fields.

It supports the promotion and networking of the industry, is distributed by direct mail, at national and international biotech conferences, exhibitions & events, to interested parties, and to our members and partners.

Biotech companies are invited to update their data for free and value an inclusion in the directory as part of their marketing efforts.

Members of the Swiss Biotech Association are entitled to present more information than non-members, and benefit from attractive additional promotion opportunities.

The digital Swiss Biotech Directory

The screenshot displays the Swiss Biotech Directory website. On the left, there is a sidebar with the 'SWISS BIOTECH' logo and a search bar. Below the search bar, there are sections for 'Filters' and 'Categories'. The 'Filters' section includes a search name or description field, a membership status filter (Swiss Biotech Association), a region/city/address filter, a canton filter, a key business filter, and a core competencies filter. The core competencies filter lists various services such as Consulting, Business development & strategy, Financial & legal services, Intellectual property protection, Project & process management, Training & recruiting, Products, Agriculture, Consultant & franchisee, and Diagnostic. A 'Search' button is located at the bottom of the sidebar. The main content area shows a grid of company profiles. Each profile includes a company name, a brief description, a location, and a list of products or services. The companies shown are: CELLnTEC Advanced Cell Systems (3014 Bern), cellvie AG (8005 Zürich), Cerdia International GmbH (4055 Basel), Cureline AG (6672 Sachseln), Infinity Communications Sarl (1215 Genève), and Microsynth AG (9436 Balgach). Each profile also features a 'Member' badge and a heart icon for favoriting.

Swiss biotech highlights

The Swiss Biotech Association

Founded in 1998, the Swiss Biotech Association represents the interests of the Swiss biotech industry. To support its members in a competitive market, the Swiss Biotech Association works to secure favorable framework conditions and facilitate access

to talents, novel technologies and financial resources. To strengthen and promote the Swiss biotech industry, the Swiss Biotech Association collaborates with numerous partners and life science clusters globally under the brand Swiss Biotech™.

Our stakeholders: Who we support and represent

The Swiss Biotech Directory lists more than 1,500 companies, reflecting both the rapid growth, as well as the diversity of this vibrant economic sector. The Swiss biotech industry has built one of the most densely populated and comprehensive biotech ecosystems worldwide.

Highly specialized clinical research organizations, manufacturers, suppliers and technical consultants complement, support, and advise biotech companies which focus on the development of their proprietary product pipelines.

Many of the globally leading CROs and suppliers have selected Switzerland as their international headquarter, and Swiss biotech

companies benefit from the proximity of Roche and Novartis and numerous international pharma companies. Increasingly, international companies select Switzerland as their hub for the production of highly complex biologics, peptides and cell products. International investors and industry specialists alike, value the numerous advantages Switzerland offers.

Our mission: Representing the interests of the industry

The Swiss Biotech Association is a non-profit, member-driven organization representing the interests of the Swiss biotech industry. Swiss biotech companies are leading the way in developing and commercializing innovative medicines, diagnostics, healthcare treatments, services and enabling technologies.

Our core objective is to ensure that the value generated by the Swiss biotech industry continues to grow and that the industry contributes to the well-being of the socio-economic ecosystem thereby enabling Switzerland to be a key player at the forefront of bioscience innovation. To this end, the Swiss Biotech Association is dedicated to supporting Swiss biotech companies through the following:

Developing favorable and competitive framework conditions

- ▶ Creating awareness of the biotech industry's needs and interests with policy makers
- ▶ Advocating a competitive tax system alongside lean and pragmatic regulations
- ▶ Fostering life science education, technology transfer and intellectual property

Attracting talent, know-how and financial resources to drive innovation and growth

- ▶ Promoting and facilitating access to funding opportunities
- ▶ Connecting investors and attractive biotech investment opportunities
- ▶ Facilitating access to national and international talent

Fostering networking through strategic, national and international partnerships

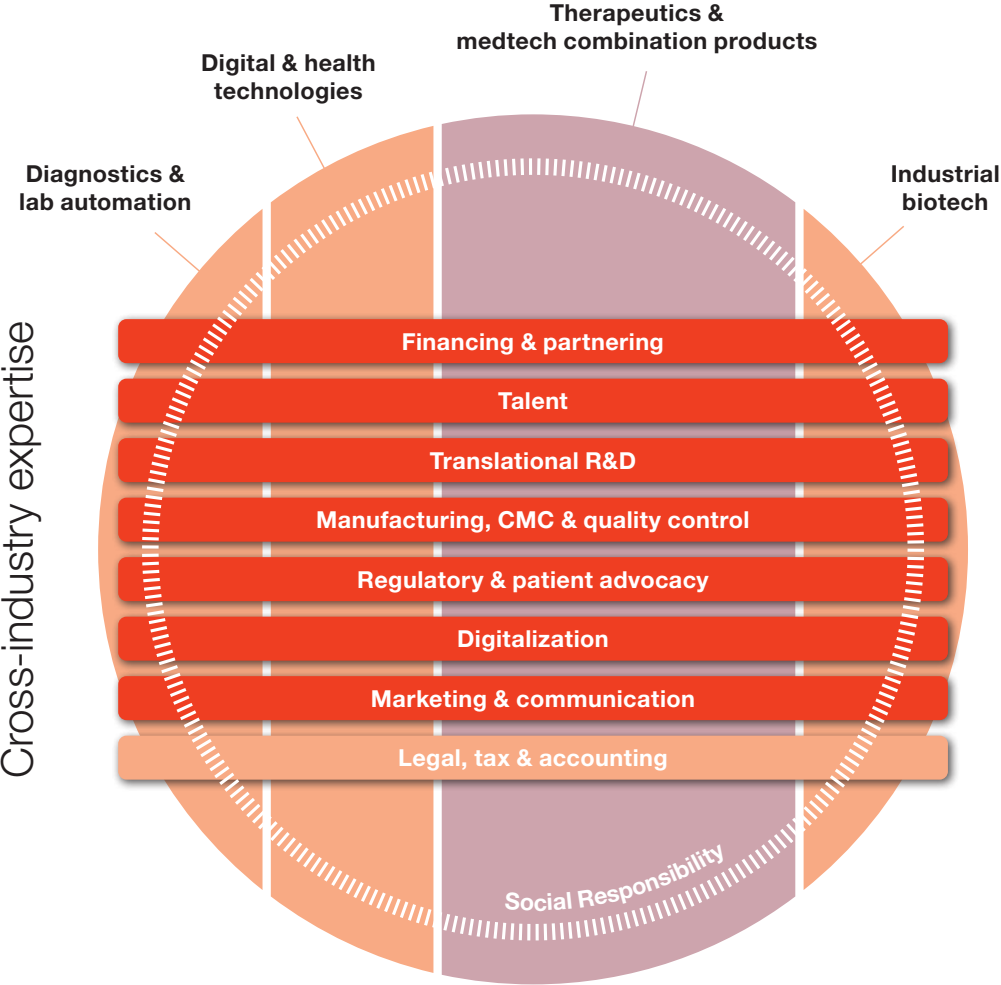

- ▶ Connecting industry stakeholders and life science clusters
- ▶ Organizing and co-promoting national and international life science events
- ▶ Providing access to privileged information through industry platforms and working groups

Promoting the accomplishments of the Swiss biotech industry

- ▶ Disseminating the value-creation of Swiss biotech companies
- ▶ Visualizing the diversity and competitiveness of Swiss biotech companies
- ▶ Presenting innovative products and technologies and their contribution to quality of life

Empowering biotechs: Support across essential areas

Biotech industry segments

 Key focus areas managed by the Swiss Biotech Association team and board

 Association chapters managed by the Swiss Biotech Association with support of specialists in the area of expertise

Our powerful platforms: How we bring our mission to life

The Swiss Biotech Association is committed to creating and maintaining platforms that benefit all Swiss biotech companies – not only its members – in financing and partnering, search for talent and in education, branding, and networking: We unite people to collaboratively shape the ideal framework conditions for a vibrant Swiss biotech community and beyond.

Boosting global visibility

By promoting biotech companies in the Swiss Biotech Directory, by disseminating their news, and with success stories

Financing and partnering

By connecting Swiss R&D biotech companies with global investors and industry partners on Swiss Biotech Ventures

Finding talent internationally

By matching Swiss job opportunities and talents on Swiss Biotech Orbit

Foster International collaboration

By uniting foreign biotech clusters with the Swiss biotech ecosystem through our Global Village

Our event platforms offer real networking to let executives and professionals discuss their unique needs in a relaxed, peer-to-peer setting. Crucial in a fast-evolving industry, face-to-face interactions accelerate innovation, strengthen partnerships, and help shape the future of a thriving Swiss biotech community.

The Swiss Biotech Day

For international networking at one of the leading global biotech conferences, with thousands of guests

Professional development and education

At the Swiss Biotech Association Academy offered by academic institutions & regular Swiss Biotech Insight meetings

Swiss biotech CEO meetings

The exclusive and informal annual networking event for Swiss R&D biotech CEOs

Swiss biotech CFO meetings

To openly share and discuss unique requirements as a CFO in the biotech sector

Swiss biotech HR leaders meetings

A day to shape business culture, leadership, and talent management in the biotech industry

Swiss Biotech Ventures platform

Swiss biotech companies, global biotech investors and industry partners equally benefit from the Swiss Biotech Ventures platform. It is free of charge and matches Swiss biotech companies, global biotech investors, and industry partners to facilitate financing, licensing and research collaborations.

With the Swiss Biotech Ventures platform, the Swiss Biotech Association enables Swiss biotech companies to present their investment and partnership opportunities to global biotech investors and multinational pharma and industry partners. Investors, family offices, foundations and pharmaceutical companies gain insight into the pipeline of the Swiss biotech hub, and easily discover and contact companies matching their strategic focus based on modalities, indications, and development stage.

Swiss Biotech Ventures is a comprehensive database that creates transparency between stakeholders. On the “sell side”, Swiss biotech companies describe their value proposition. On the “buy side”, global biotech investors and pharmaceutical representatives identify investment and partnership opportunities matching with their selection criteria. Both sides present their focus and goals, rendering matchmaking between these players efficient and transparent.

Swiss Biotech Ventures is steadily growing. At the beginning of 2025, more than 1,000 investors and pharmaceutical companies were listed, and about 240 innovative venture projects from Swiss biotech companies were presented. Every time a venture matching the selection criteria of an investor is added, or its status changes (e.g. from preclinical to clinical phase I), interested parties receive an email notification and can find out more on the platform.

Both sides gain valuable time as individual communication on the project development is replaced by timely, transparent and consistent information. In the Swiss tradition, the Swiss Biotech Association takes a neutral stance. No company is promoted,

nor privileged information is shared with any of the parties, nor does the Swiss Biotech Association receive any success fee. Anyone on the platform has free access to identical information, simultaneously, transparently and to the benefit of all parties.

In conjunction with the Swiss Biotech Ventures platform, the Swiss Biotech Association also helps companies to present and partner at the Swiss Biotech Day and at national and international events. Quarterly highlight reports from the Swiss biotech industry with background information complete the offering.

Join Swiss Biotech Ventures and gain access to:

- ▶ free of charge platform, by invitation only
- ▶ matching Swiss biotech companies with global biotech investors and industry partners to facilitate financing, licensing and research collaboration
- ▶ timely, transparent, simultaneous, and consistent information
- ▶ a steadily growing database of thriving biotech ventures
- ▶ free newsletters on Swiss biotech venture highlights and background information

Use this QR code to register on Swiss Biotech Ventures and promote the platform amongst your peers around the globe

Swiss Biotech Orbit: Match talent and opportunities

Bridging talents to biotech brilliance

The Orbit platform has an exiting talent pool of graduates from business schools and universities, PhD and PostDoc, and experienced biotech professionals who are interested in careers in the Swiss biotech and life science industry.

Swiss Biotech Orbit helps to match job opportunities and talents, and supports all Swiss biotech companies that can offer job opportunities.

The Orbit platform features a wide range of local talent, with searching and filtering tools to help you find the right person for the job.

David Pejowski, Co-founder and Co-CEO,
Adoram Therapeutics

Rapidly expanding

The non-public Swiss Biotech Orbit talent platform matches the skills of talents with the criteria of job offers. Since its launch, numerous life science companies and talents have joined, and more are joining every day, contributing to the rapid expansion of the platform.

Swiss Biotech Orbit opens doors to exciting opportunities for professionals, and future talents in life sciences R&D, and supports Swiss biotech companies in identifying the right talent in the industry.

**SWISS+

We enhance the visibility of biotech companies

These members of the Swiss Biotech Association benefit from a cost-effective marketing opportunity, with their logos featured for a year on our communication tools.

SWISS BIOTECH SUCCESS STORIES

Celebrating and honoring major achievements

Swiss Biotech Success Stories demonstrate the power and potential of the industry

The Swiss Biotech Success Stories Awards recognize valuable accomplishments and honor those who have made important and sustainable contributions to the biotech industry in Switzerland. The awards are presented each year at the Swiss Biotech Day and reflect the diversity and achievements of this innovative sector.

Switzerland is one of the world's leading biotech hubs and attracts many foreign companies, specialists and investors. It provides over 50,000 jobs and, together with the pharmaceutical and chemical industries, accounts for almost half of Swiss exports.

To make the industry's impact more visible, the Swiss Biotech Success Stories initiative was launched in 2018. Selected success stories are showcased to illustrate how Swiss biotech companies help patients, improve health care worldwide, and make a valuable and significant contribution to the Swiss and global economy.

Laureates are individuals or groups who have earned extraordinary merits. Success is broadly defined as scientific, translational,

medical or commercial, together with other aspects that have a positive impact on the biotech and life science industry and society in Switzerland.

"It is essential to share with the public the importance and success factors of biotech companies and ensure that decision-makers understand what it takes for the industry to develop and remain competitive," says Michael Altorfer, CEO of the Swiss Biotech Association. "Young talent should be inspired and motivated to take a closer look at the great variety of career profiles in biotech."

12 success categories

- ▶ Completed achievement with lasting impact
- ▶ Scientific breakthrough
- ▶ New technology
- ▶ Strong impact on society
- ▶ Product approval and sustainable revenues
- ▶ Important IP, innovative deal-making, acquisition
- ▶ Involvement of one or more Swiss citizens
- ▶ Swiss-based company / institution
- ▶ Creation of jobs in Switzerland
- ▶ Other aspect with a direct link to Switzerland
- ▶ Enabler for the biotech industry
- ▶ Swissness: Think global, made in Switzerland

An independent jury of experts annually selects the Swiss Biotech Success Stories winners

SWISS BIOTECH SUCCESS STORIES

Celebrating and honoring major achievements

- ▶ Headquartered in Allschwil, Actelion is part of the Johnson & Johnson Family of Companies. Its ground-breaking research and medicines have been a key contributor to improve the lives of people affected by pulmonary hypertension, and made Actelion an industry leader in this area.

Werner
Arber

- ▶ Werner Arber, Swiss microbiologist and geneticist, won the 1978 Nobel Prize in Physiology or Medicine for his discovery of restriction endonucleases. His groundbreaking research in the field of molecular genetics was instrumental in the development of biotechnology.

BACHEM

- ▶ Bachem situated in Allschwil is a leading company specializing in development and manufacture of peptides and oligonucleotides. With over 50 years of experience and expertise, Bachem provides products and services for research, clinical development and commercial application to pharmaceutical and biotechnology globally

- ▶ Basilea Pharmaceutica in Allschwil is a biopharmaceutical R&D company, focused on the development of products that address the medical challenges in the therapeutic area of anti-infectives. They are committed to developing and commercializing innovative pharmaceutical products to meet the medical needs of patients with serious and life-threatening conditions.

- ▶ Biogen in Baar is a leading biotechnology company that pioneers innovative science and delivers new medicines to transform patient's lives. A broad portfolio of medicines to treat multiple sclerosis, the first approved treatment for spinal muscular atrophy and the state-of-the-art biologics manufacturing facility in Luterbach are proof of Biogen's pioneering approach.

- ▶ Family-owned Debiopharm from Lausanne, identifies high-potential compounds in oncology and for the treatment of bacterial infections. They are tested in clinical development and licensed to business partners globally. Millions of patients benefit from their therapies every year.

- ▶ ESBATech, now a Novartis company, is recognized for its pioneering role in developing single-chain antibody fragments for ophthalmic indications. The most advanced product from the ESBATech platform received market approval by the FDA in October 2019 and shortly thereafter in all major markets.

- ▶ The foundation promotes scientific research on neuromuscular diseases (myopathies) affecting children and adults. It awards grants to young researchers and has provided seed funding for two startups. It has established a scientific forum to encourage exchange of ideas, and also supports centers which care for patients.

- ▶ Genedata, global market leader for software solutions that digitalize data-rich and complex bio-pharmaceutical R&D processes, enables an R&D revolution driven by precision medicines and artificial intelligence approaches. It helps the industry to deliver innovative biotherapeutics, vaccines and cell & gene therapies faster.

- ▶ The Schlieren-based company is an integral part of Roche Pharmaceutical Research and Early Development since 2005, and a pioneer in antibody engineering in cancer immunotherapy. Its antibody glycosylation technology increases immune-mediated cancer cell killing and builds the basis for improved cancer medicines.

- ▶ Helsinn, an important employer in Ticino, has a broad portfolio of marketed cancer care products and a deep development pipeline. It has built significant R&D and manufacturing capacities, also advances patient care and supports healthcare innovation with its investment fund.

- ▶ Humabs BioMed, subsidiary of Vir Biotechnology, uses its immunologic expertise and cutting-edge technology to combat infectious diseases and other serious conditions. They are a pioneer in the discovery, engineering, and development of human monoclonal antibodies, e.g. crucial for fighting Ebola and COVID-19, and have helped transform the infectious disease landscape.

SWISS BIOTECH SUCCESS STORIES

Celebrating and honoring major achievements

Etienne
Jornod

- ▶ Etienne Jornod, Swiss entrepreneur, was Executive Chairman of the Vifor-Galenica Group delivering 25 consecutive double-digit net profit growth, supporting millions of patients and creating thousands of jobs. In 2020, he acquired OM Pharma with friends, aiming to create a unique biopharmaceutical company based on bacteria lysates expertise.

Lonza

- ▶ Lonza is one of the world's largest healthcare manufacturing organizations, serving pharmaceutical, biotech and nutritional markets. Lonza's work enables its customers to develop and commercialize their therapeutic discoveries, allowing their patients to benefit from life-saving and life-enhancing treatments.

- ▶ Founded by the renowned immunologist, Professor Bernard Mach MD PhD, privately-owned Novimmune is a leading light in the discovery and development of fully-human, antibody-based drugs used to fight autoimmune and inflammatory diseases and cancer.

- ▶ Fully integrated into GlaxoSmithKline since 2013, Okairos from Basel developed innovative T-cell based vaccines for major infectious diseases such as malaria, hepatitis C, HIV, and Ebola. Its novel replication-incompetent adenovirus vectors could enable the development of important new vaccines and offer immunizations against illnesses that lack vaccines.

- ▶ The advanced technologies in protein expression by Selexis, based in Plan-les-Ouates, provide biotech and pharmaceutical companies a rapid, stable, and cost-effective solution for the production of recombinant proteins. In 2017, Selexis was acquired by JSR and integrated into KBI Biopharma in 2023.

- ▶ SOPHiA GENETICS generates clinically actionable insights and improved patient outcomes from a global data-sharing network. They democratize data-driven medicine globally through a cloud-based, decentralized SaaS platform, empowering shared insights among clinicians and researchers, and aiming for equal access to knowledge and improved clinical outcomes.

Hans-Peter Strebel

- ▶ Dr. Hans-Peter Strebel founded Fumapharm AG with three other scientists in 1983. Its successful research led to the development of Tecfidera, a disease modifying therapy for relapsing multiple sclerosis (MS). More than 600,000 patients worldwide have already benefited from the therapy.

- ▶ The trio of foundations has been supporting biotech startups with great success thereby making a significant contribution to the growth of the Swiss biotech industry. They share the nomination for the Swiss Biotech Success Stories Award.

- ▶ This transformational joint venture provides Vifor Pharma direct access to dialysis patients, facilitating the product distribution and recruitment for clinical development. It transformed the company from Glattbrugg rapidly into a global nephrology corporation. Such vertical integration is a role model for the convergence of different life science sectors.

Araris Biotech AG

Private company, founded 2019

Member Swiss Biotech Association

Araris Biotech AG is a spin-off company from the Paul Scherrer Institute (PSI) and ETH Zurich focusing on the commercialization of a novel antibody-drug conjugate (ADC)-linker technology. Araris' innovative platform allows for the attachment of any payload to "off the shelf" antibodies without the need of prior antibody engineering in one-step.

Key business: R&D

Core competencies: Therapeutics/vaccines (human)

Products, services, technology:

The resulting ADCs have a well-defined drug-to-antibody ratio, are stable and monomeric. All these favorable properties contribute to the high efficacy, stability and low level of toxicity observed so far. In summary, this approach enables the generation of ADC compounds for the treatment of patients with a high unmet medical need.

Ceidos SA

Private company, founded 2019

Member Swiss Biotech Association

Ceidos is a Swiss biotech company developing the C-Netics, an innovative device for automated cell culture monitoring. Their mission is to optimize bioproduction processes for modern treatments through automation and innovative technologies.

Key business: Production (of own products), R&D, Sales & marketing (of own products)

Core competencies: Analytical tests & screening, Biochip/biosensors, Cell culture, cell technology, Contract R&D, Laboratory equipment & devices, Production equipment, Products

Products, services, technology:

Ceidos developed C-Netics, an innovative device for automating the monitoring of cell cultures. It optimizes the cell expansion process for the production of biopharmaceuticals and ATPMs reducing production costs and increasing product quality. It is compatible with most bioreactor models.

InkVivo Technologies AG

Private company, founded 2023

Member Swiss Biotech Association

InkVivo Technologies combines its patented biomaterial platform with advanced manufacturing technologies to fabricate novel delivery systems that ensure controlled and prolonged release of active ingredients (e.g., small molecules, biologics and micronutrients).

Key business: Production, R&D, Service provider

Core competencies: Consulting, Contract R&D, Cosmetics & fragrances, Medical devices/technologies, Nutrition (human & animal), Platform technologies, Products, Services, Therapeutics/vaccines (human)

Products, services, technology:

We support pharmaceutical and nutraceutical companies to design drug delivery systems with added value (e.g., novel biomaterial formulation and manufacturing). InkVivo's technology can be used to provide temporal controlled release of small molecules, biologics, and micronutrients.

MUVON Therapeutics AG

Private company, founded 2020

Member Swiss Biotech Association

MUVON Therapeutics is a Swiss clinical stage biotech company with the goal of revolutionizing the treatment of various diseases caused by muscle damage or degradation through the use of the patients' own cells. Our initial area of focus is the treatment of stress urinary incontinence in women.

Key business: Production (of own products), R&D

Core competencies: Products, Therapeutics/vaccines (human)

Products, services, technology:

The MPC therapy uses the patient's own muscle precursor cells (MPCs), isolated from a small biopsy and expanded under GMP conditions, to regenerate damaged skeletal muscle tissue and thus increasing the muscles contraction strength.

tissuelabs

TissueLabs SA

Private company, founded 2021

Member Swiss Biotech Association

TissueLabs is a Swiss biotech pioneering biofabrication, developing 3D bioprinters, tissue-specific hydrogels, and engineered tissues. Supporting research, drug testing, and regenerative medicine, its long-term vision is to create the first transplantable bioartificial heart.

Key business: Production (of own products), R&D, Sales & marketing (of own products)

Core competencies: Cell culture, cell technology, Laboratory equipment & devices, Platform technologies, Products, Reagents & (bio)chemicals, Services, Therapeutics/vaccines (human)

Products, services, technology:

3D Bioprinters / TissueStart™ 3D Bioprinter / TissueRay™ / 3D Bioprinter / Tissue-specific Biomaterials / MatriXpec™ Hydrogels / MatriSponge™ Bioactive Scaffolds / TissueCoat™ ECM Surface Coating

TOLREMO therapeutics AG

Private company, founded 2017

Member Swiss Biotech Association

TOLREMO engages in the discovery and development of small molecule drugs that target novel drug resistance pathways in cancer therapy. TOLREMO's vision is to meaningfully prolong the lives of cancer patients using its personalized anti-drug-resistance therapies.

Key business: R&D

Core competencies: Platform technologies, Therapeutics/vaccines (human)

Products, services, technology: Proprietary drug discovery and development platform to explore novel resistance-breaking therapies that can be combined with existing cancer drugs to prevent resistance development in several types of cancer. Two parallel drug development programs are ongoing.

Watson-Marlow AG

Public company, founded 1956

Member Swiss Biotech Association

Watson-Marlow is a specialist manufacturer of pumps and tubing, fluid path components and single-use technology for GMP regulated industries. A portfolio of products and assembly design capabilities allows WMFTS to provide accuracy, reliability, and sterility in all fluid handling applications.

Key business: Distributor, Supplier

Core competencies: Laboratory equipment & devices, Production equipment

Products, services, technology:

Watson-Marlow Pumps and Tubing: peristaltic pumps and precision tubing / WMArchitect™: single-use fluid path management solutions / BioPure: single use fluid path components and assemblies / Flexicon: aseptic filling and capping systems / Affex: PTFE-lined flexible hoses / ASEPCO: high purity aseptic valves

Xemperia SA

Private company, founded 2023

Member Swiss Biotech Association

XEMPERIA, a spin-off from the University of Fribourg, is pioneering a groundbreak-

ing approach to blood testing that leverages the body's immune response to detect breast cancer at its earliest and most treatable stage.

Key business: R&D

Core competencies: Analytical tests & screening, Bioinformatics, Diagnostics, Medical devices/technologies, Platform technologies

Products, services, technology: XEMPERIA's flagship product is a PCR kit for the early detection of breast cancer, featuring reagents, protocols, and software.

In addition, XEMPERIA is developing advanced nanosensors for nucleic acid detection, utilizing DNA-based nanotechnologies to incorporate into point of care (PoC) devices.

SWISS BIOTECH DAY 2026

© Swiss Biotech Association

May 4–5, 2026
Congress Center Basel

What you can expect:

- › Welcome reception on May 3
- › Meet over 2,500 senior experts from the life science industry
- › More than 100 exhibitors and the Global Village with international delegations from all over the world
- › Innovative biotech start-ups and medium-sized biotech companies
- › Thematic company pitching sessions and panel discussions
- › Swiss Biotech Success Stories Awards
- › Swiss Biotech Report 2026
- › Pre-scheduled one-to-one partnering meetings
- › General Assembly of the Swiss Biotech Association

Sign in on our website at
swissbiotechday.ch
and stay updated about any news.

SWISS+ BIOTECH™

Collaborate with us and use the power
of our networking platforms

Onsite networking

Join the yearly Swiss Biotech Day for networking
at the premier global biotechnology conference

Brand promotion

Unlock business opportunities by listing your company
in our Swiss Biotech Directory

Financing and Partnering

Utilize our Swiss Biotech Ventures platform to engage
with Swiss-based R&D biotech companies

Talent search

International talent is matched with job opportunities
in Switzerland on our Swiss Biotech Orbit platform

Professional development and education

Find a perfect mix of education on a professional level
at the Swiss Biotech Association Academy

International collaboration

Our Global Village connects foreign biotech hubs with
the Swiss biotech ecosystem for lasting business ties

Join the Swiss Biotech Association

1 Nation 1 Biotech Cluster

Focus on Solutions

Swiss Cell Culture Solutions
for research and
industrial applications

Our product line includes:

- Standard and customized liquid and powder media
- Production media for CHO, HEK293, Hybridoma and Insect Cells
- Serum Free media
- Chemically Defined media
- Animal Component Free media
- Water for Injection (WFI)
- Buffers and salt solutions
- Supplements & auxiliary reagents
- Animal sera
