Collaborate with Swiss Biotech

Switzerland enjoys a great biotech ecosystem populated with leading academic institutions and hospitals, and a diverse talent pool of experienced pharma and biotech scientists and executives. This nurtures and supports many successful start-ups and established biotech companies. As of the beginning of 2026, the Swiss biotech hub comprises almost 1,700 biotech companies, creating more than 60,000 high-quality jobs.

The Swiss Biotech Association supports this industry and its members by:

- ▶ developing favorable and competitive framework conditions
- ▶ attracting talent and financial resources
- ▶ fostering networking through strategic national and international partnerships
- ▶ promoting the industry's accomplishments and contributions

The 2026 edition of the Swiss Biotech Directory supports all of these objectives. By providing an overview of the Swiss biotech stakeholders, we offer insight, facilitate access to Swiss biotech companies, and aim at fostering international collaborations. At the same time, this directory will serve as a valuable summary for international talent, biotech investors and Swiss biotech ecosystem.

The Swiss Biotech Directory is constantly updated and enlarged. It is available online (just scan the QR code on the next page).

We encourage you to provide us with feedback as to what you find useful and what we might add, improve or update. Promoting the directory by linking to it from your digital channels or referring to it in your publications is highly appreciated.

Sincerely yours,

A handwritten signature in blue ink, appearing to read 'P. Amstutz'.

Patrick Amstutz
President

A handwritten signature in blue ink, appearing to read 'M. Altorfer'.

Michael Altorfer
CEO

The Swiss Biotech Directory

The Swiss Biotech Association has been publishing the most comprehensive compendium of the Swiss biotech industry since 2008.

Based on the digital version, it provides a yearly, handy overview of Swiss companies active in biotechnology and related fields.

It supports the promotion and networking of the industry, is distributed via direct mail, at national and international biotech conferences, exhibitions & events, to interested parties, our members and partners.

Biotech companies are invited to update their data free of charge and value their inclusion in the directory as part of their marketing efforts.

Members of the Swiss Biotech Association are entitled to present more information than non-members, and benefit from attractive additional promotion opportunities.

The digital Swiss Biotech Directory

The screenshot displays the digital Swiss Biotech Directory website. At the top left is the 'SWISS BIOTECH' logo. A search bar is located next to it. The top navigation bar includes links for 'News', 'Events', 'The industry', 'Association', and 'Log in or Register'. A 'Add listing' button is on the right. The main content area is divided into a left sidebar and a main grid of company listings. The sidebar contains filters for 'Search name or description', 'Membership Swiss Biotech Association', 'Region, city, address', 'Canton', 'Key business', and 'Core competencies'. The 'Core competencies' section lists various services with checkboxes: Consulting, Business development & strategy, Financial & legal services, Intellectual property protection, Project & process management, Training & recruiting, Products, Agriculture, Comorbid & Regenerative, and Diagnostic. A 'Search' button and a 'Reset Filters' link are at the bottom of the sidebar. The main grid shows six company listings, each with a 'Member' badge, a profile picture, the company name, a brief description, location, and a list of competencies with counts. The listings are: Azafaros Switzerland AG (Basel), CELLnTEC Advanced Cell Systems (Birm), cellvie AG (Zürich), Cerdia International GmbH (Basel), Infinity Communications Sarl (Genève), and Microsynth AG (Balgach).

The Swiss Biotech Association

Founded in 1998, the Swiss Biotech Association represents the interests of the Swiss biotech industry. To support its members in a competitive market, the Swiss Biotech Association works to secure favorable framework conditions and facilitate access

to talents, novel technologies and financial resources. To strengthen and promote the Swiss biotech industry, the Swiss Biotech Association collaborates with numerous partners and life science clusters globally under the brand Swiss Biotech™.

Our stakeholders: Who we support and represent

The Swiss Biotech Directory lists almost 1,700 companies, reflecting both the rapid growth, as well as the diversity of this vibrant economic sector. The Swiss biotech industry has built one of the most densely populated and comprehensive biotech ecosystems worldwide.

Highly specialized clinical research organizations, manufacturers, suppliers and technical consultants complement, support, and advise biotech companies which focus on the development of their proprietary product pipelines.

Many of the globally leading CROs and suppliers have selected Switzerland as their international headquarter, and Swiss biotech

companies benefit from the proximity of Roche and Novartis and numerous international pharma companies. Increasingly, international companies select Switzerland as their hub for the production of highly complex biologics, peptides and cell products. International investors and industry specialists alike, value the numerous advantages Switzerland offers.

Our mission: Representing the interests of the industry

The Swiss Biotech Association is a non-profit, member-driven organization representing the interests of the Swiss biotech industry. Swiss biotech companies are leading the way in developing and commercializing innovative medicines, diagnostics, healthcare treatments, services and enabling technologies.

Our core objective is to ensure that the value generated by the Swiss biotech industry continues to grow and that the industry contributes to the well-being of the socio-economic ecosystem thereby enabling Switzerland to be a key player at the forefront of bioscience innovation. To this end, the Swiss Biotech Association is dedicated to supporting Swiss biotech companies through the following:

Developing favorable and competitive framework conditions

- ▶ Creating awareness of the biotech industry's needs and interests with policy makers
- ▶ Advocating a competitive tax system alongside lean and pragmatic regulations
- ▶ Fostering life science education, technology transfer and intellectual property

Attracting talent, know-how and financial resources to drive innovation and growth

- ▶ Promoting and facilitating access to funding opportunities
- ▶ Connecting investors and attractive biotech investment opportunities
- ▶ Facilitating access to national and international talent

Fostering networking through strategic, national and international partnerships

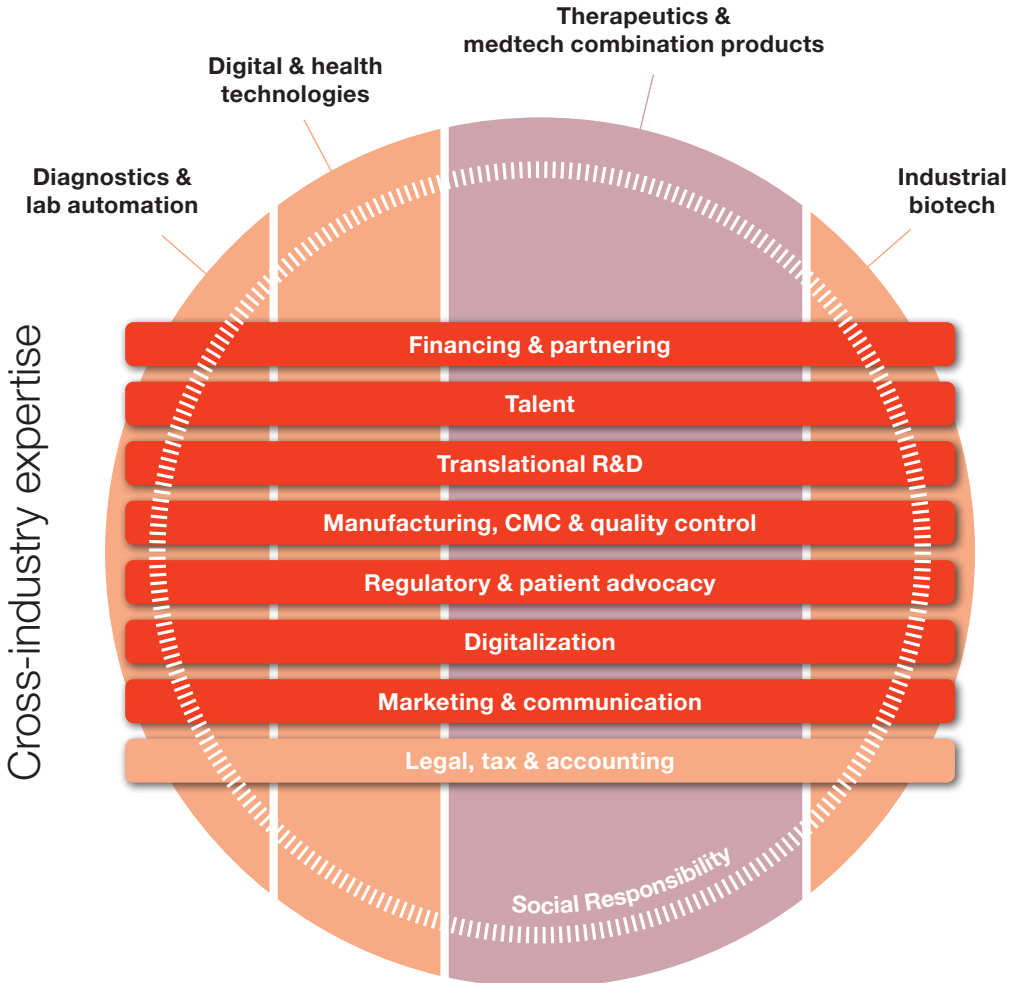

- ▶ Connecting industry stakeholders and life science clusters
- ▶ Organizing and co-promoting national and international life science events
- ▶ Providing access to privileged information through industry platforms and working groups

Promoting the accomplishments of the Swiss biotech industry

- ▶ Disseminating the value-creation of Swiss biotech companies
- ▶ Visualizing the diversity and competitiveness of Swiss biotech companies
- ▶ Presenting innovative products and technologies and their contribution to quality of life

Empowering biotechs: Support across essential areas

Biotech industry segments

Key focus areas managed by the Swiss Biotech Association team and board

Association chapters managed by the Swiss Biotech Association with support of specialists in the area of expertise

Our powerful platforms: How we bring our mission to life

The Swiss Biotech Association is committed to creating and maintaining platforms that benefit all Swiss biotech companies – not only its members – in financing and partnering, search for talent and in education, branding, and networking: We unite people to collaboratively shape the ideal framework conditions for a vibrant Swiss biotech community and beyond.

Boosting global visibility

By promoting biotech companies in the Swiss Biotech Directory, by disseminating their news, and with success stories

Financing and partnering

By connecting Swiss R&D biotech companies with global investors and industry partners on Swiss Biotech Ventures

Finding talent internationally

By matching Swiss job opportunities and talents on Swiss Biotech Orbit

Foster International collaboration

By uniting foreign biotech clusters with the Swiss biotech ecosystem through our Global Village

Professional development and education

Offered at the Swiss Biotech Association Academy by academic institutions & regular Swiss Biotech Insight meetings

Our event platforms offer real networking to let executives and professionals discuss their unique needs in a relaxed, peer-to-peer setting. Crucial in a fast-evolving industry, face-to-face interactions accelerate innovation, strengthen partnerships, and help shape the future of a thriving Swiss biotech community.

The Swiss Biotech Day

For international networking at one of the leading global biotech conferences, with thousands of guests

Swiss biotech CEO meetings

The exclusive and informal annual networking event for Swiss R&D biotech CEOs

Swiss biotech CFO meetings

To openly share and discuss unique requirements as a CFO in the biotech sector

Swiss biotech CMC/quality control meetings

Enable CMC specialists to share experience, avoid pitfalls and optimize the outsourcing of manufacturing

Swiss biotech CSO meetings

Gathering Swiss biotech CSOs to discuss R&D trends in translational medicine and share best practices

Swiss biotech HR leaders meetings

A day to shape business culture, leadership, and talent management in the biotech industry

Swiss Biotech Ventures platform

Swiss biotech companies, global biotech investors and industry partners equally benefit from the Swiss Biotech Ventures platform. It is free of charge and matches Swiss biotech companies, global biotech investors, and industry partners to facilitate financing, licensing and research collaborations.

With the Swiss Biotech Ventures platform, the Swiss Biotech Association enables Swiss biotech companies to present their investment and partnership opportunities to global biotech investors and multinational pharma and industry partners. Investors, family offices, foundations and pharmaceutical companies gain insight into the pipeline of the Swiss biotech hub, and easily discover and contact companies matching their strategic focus based on modalities, indications, and development stage.

Swiss Biotech Ventures is a comprehensive database that creates transparency between stakeholders. On the “sell side”, Swiss biotech companies describe their value proposition. On the “buy side”, global biotech investors and pharmaceutical representatives identify investment and partnership opportunities matching with their selection criteria. Both sides present their focus and goals, rendering matchmaking between these players efficient and transparent.

Swiss Biotech Ventures is steadily growing. At the beginning of 2026, more than 1,000 investors and pharmaceutical companies were listed, and about 270 innovative venture projects from Swiss biotech companies were presented. Every time a venture matching the selection criteria of an investor is added, or its status changes (e.g. from preclinical to clinical phase I), interested parties receive an email notification and can find out more on the platform.

Both sides gain valuable time as individual communication on the project development is replaced by timely, transparent and consistent information. In the Swiss tradition, the Swiss Biotech Association takes a neutral stance. No company is promoted,

nor privileged information is shared with any of the parties, nor does the Swiss Biotech Association receive any success fee. Anyone on the platform has free access to identical information, simultaneously, transparently and to the benefit of all parties.

In conjunction with the Swiss Biotech Ventures platform, the Swiss Biotech Association also helps companies to present and partner at the Swiss Biotech Day and at national and international events. Quarterly highlight reports from the Swiss biotech industry with background information complete the offering.

Join Swiss Biotech Ventures and gain access to:

- ▶ free of charge platform, by invitation only
- ▶ matching Swiss biotech companies with global biotech investors and industry partners to facilitate financing, licensing and research collaboration
- ▶ timely, transparent, simultaneous, and consistent information
- ▶ a steadily growing database of thriving biotech ventures
- ▶ free newsletters on Swiss biotech venture highlights and background information

Use this QR code to register on Swiss Biotech Ventures and promote the platform amongst your peers around the globe

Swiss Biotech Orbit: Match talent and opportunities

Bridging talents to biotech brilliance

The Orbit platform has an exciting talent pool of graduates from business schools and universities, PhD and PostDoc, and experienced biotech professionals who are interested in careers in the Swiss biotech and life science industry.

Swiss Biotech Orbit helps to match job opportunities and talents, and supports all Swiss biotech companies that can offer job opportunities.

The Orbit platform features a wide range of local talent, with searching and filtering tools to help you find the right person for the job.

David Pejoski, Co-founder and Co-CEO,
Adoram Therapeutics

Rapidly expanding

The non-public Swiss Biotech Orbit talent platform matches the skills of talents with the criteria of job offers. Since its launch, numerous life science companies and talents have joined, and more are joining every day, contributing to the rapid expansion of the platform.

Swiss Biotech Orbit opens doors to exciting opportunities for professionals, and future talents in life sciences R&D, and supports Swiss biotech companies in identifying the right talent in the industry.

SWISS BIOTECH SUCCESS STORIES

Celebrating and honoring major achievements

Swiss Biotech Success Stories demonstrate the power and potential of the industry

The Swiss Biotech Success Stories Awards recognize valuable accomplishments and honor those who have made important and sustainable contributions to the biotech industry in Switzerland. The awards are presented each year at the Swiss Biotech Day and reflect the diversity and achievements of this innovative sector.

Switzerland is one of the world's leading biotech hubs and attracts many foreign companies, specialists and investors. It provides over 60,000 jobs and, together with the pharmaceutical and chemical industries, accounts for almost half of Swiss exports.

To make the industry's impact more visible, the Swiss Biotech Success Stories initiative was launched in 2018. Selected success stories are showcased to illustrate how Swiss biotech companies help patients, improve health care worldwide, and make a valuable and significant contribution to the Swiss and global economy.

Laureates are individuals or groups who have earned extraordinary merits. Success is broadly defined as scientific, translational,

medical or commercial, together with other aspects that have a positive impact on the biotech and life science industry and society in Switzerland.

"It is essential to share with the public the importance and success factors of biotech companies and ensure that decision-makers understand what it takes for the industry to develop and remain competitive," says Michael Altorfer, CEO of the Swiss Biotech Association. "Young talent should be inspired and motivated to take a closer look at the great variety of career profiles in biotech."

12 success categories

- ▶ Completed achievement with lasting impact
- ▶ Scientific breakthrough
- ▶ New technology
- ▶ Strong impact on society
- ▶ Product approval and sustainable revenues
- ▶ Important IP, innovative deal-making, acquisition
- ▶ Involvement of one or more Swiss citizens
- ▶ Swiss-based company / institution
- ▶ Creation of jobs in Switzerland
- ▶ Other aspect with a direct link to Switzerland
- ▶ Enabler for the biotech industry
- ▶ Swissness: Think global, made in Switzerland

SWISS BIOTECH SUCCESS STORIES

Celebrating and honoring major achievements

- ▶ Headquartered in Allschwil, Actelion is part of the Johnson & Johnson Family of Companies. Its ground-breaking research and medicines have been a key contributor to improve the lives of people affected by pulmonary hypertension, and made Actelion an industry leader in this area.

Werner
Arber

- ▶ Prof. Dr. Werner Arber, Swiss microbiologist and geneticist, won the 1978 Nobel Prize in Physiology or Medicine for his discovery of restriction endonucleases. His groundbreaking research in the field of molecular genetics was instrumental in the development of biotechnology.

- ▶ Bachem situated in Bubendorf is a leading company specializing in development and manufacture of peptides and oligonucleotides. With over 50 years of experience and expertise, Bachem provides products and services for research, clinical development and commercial application to pharmaceutical and biotechnology companies globally.

- ▶ Basilea Pharmaceutica in Allschwil is a biopharmaceutical R&D company, focused on the development of products that address the medical challenges in the therapeutic area of anti-infectives. They are committed to developing and commercializing innovative pharmaceutical products to meet the medical needs of patients with serious and life-threatening conditions.

- ▶ Biogen in Baar is a leading biotechnology company that pioneers innovative science and delivers new medicines to transform patient's lives. A broad portfolio of medicines to treat multiple sclerosis, the first approved treatment for spinal muscular atrophy and the state-of-the-art biologics manufacturing facility in Luterbach are proof of Biogen's pioneering approach.

- ▶ Family-owned Debiopharm from Lausanne, identifies high-potential compounds in oncology and for the treatment of bacterial infections. They are tested in clinical development and licensed to business partners globally. Millions of patients benefit from their therapies every year.

▶ ESBATEch, now a Novartis company, is recognized for its pioneering role in developing single-chain antibody fragments for ophthalmic indications. The most advanced product from the ESBATEch platform received market approval by the FDA in October 2019 and shortly thereafter in all major markets.

▶ The foundation promotes scientific research on neuromuscular diseases (myopathies) affecting children and adults. It awards grants to young researchers and has provided seed funding for two startups. It has established a scientific forum to encourage exchange of ideas, and also supports centers which care for patients.

▶ Genedata, global market leader for software solutions that digitalize data-rich and complex bio-pharmaceutical R&D processes, enables an R&D revolution driven by precision medicines and artificial intelligence approaches. It helps the industry to deliver innovative biotherapeutics, vaccines and cell & gene therapies faster.

▶ The Schlieren-based company is an integral part of Roche Pharmaceutical Research and Early Development since 2005, and a pioneer in antibody engineering in cancer immunotherapy. Its antibody glycosylation technology increases immune-mediated cancer cell killing and builds the basis for improved cancer medicines.

▶ Helsinn, an important employer in Ticino, has a broad portfolio of marketed cancer care products and a deep development pipeline. It has built significant R&D and manufacturing capacities, also advances patient care and supports healthcare innovation with its investment fund.

▶ Humabs BioMed, subsidiary of Vir Biotechnology, uses its immunologic expertise and cutting-edge technology to combat infectious diseases and other serious conditions. They are a pioneer in the discovery, engineering, and development of human monoclonal antibodies, e.g. crucial for fighting Ebola and COVID-19, and have helped transform the infectious disease landscape.

SWISS BIOTECH SUCCESS STORIES

Celebrating and honoring major achievements

Etienne
Jornod

- ▶ Etienne Jornod, Swiss entrepreneur, was Executive Chairman of the Vifor-Galenica Group delivering 25 consecutive double-digit net profit growth, supporting millions of patients and creating thousands of jobs. In 2020, he acquired OM Pharma with friends, aiming to create a unique biopharmaceutical company based on bacteria lysates expertise.

Lonza

- ▶ Lonza is one of the world's largest healthcare manufacturing organizations, serving pharmaceutical, biotech and nutritional markets. Lonza's work enables its customers to develop and commercialize their therapeutic discoveries, allowing their patients to benefit from life-saving and life-enhancing treatments.

Henri B.
Meier

- ▶ Dr. Dr. h.c. Henri B. Meier's career spans decades, combining experience in economic development, healthcare, finance, and entrepreneurship. His work has significantly influenced the venture capital landscape in Switzerland and globally, particularly in the healthcare and biotech sectors.

- ▶ Founded by the renowned immunologist, Professor Bernard Mach MD PhD, privately-owned Novimmune is a leading light in the discovery and development of fully-human, antibody-based drugs used to fight autoimmune and inflammatory diseases and cancer.

- ▶ Fully integrated into GlaxoSmithKline since 2013, Okairos from Basel developed innovative T-cell based vaccines for major infectious diseases such as malaria, hepatitis C, HIV, and Ebola. Its novel replication-incompetent adenovirus vectors could enable the development of important new vaccines and offer immunizations against illnesses that lack vaccines.

- ▶ The advanced technologies in protein expression by Selexis, based in Plan-les-Ouates, provide biotech and pharmaceutical companies a rapid, stable, and cost-effective solution for the production of recombinant proteins. In 2017, Selexis was acquired by JSR and integrated into KBI Biopharma in 2023.

- ▶ SOPHiA GENETICS generates clinically actionable insights and improved patient outcomes from a global data-sharing network. They democratize data-driven medicine globally through a cloud-based, decentralized SaaS platform, empowering shared insights among clinicians and researchers, and aiming for equal access to knowledge and improved clinical outcomes.

Hans-Peter Strebel

- ▶ Dr. Hans-Peter Strebel founded Fumapharm AG with three other scientists in 1983. Its successful research led to the development of Tecfidera, a disease modifying therapy for relapsing multiple sclerosis (MS). More than 600,000 patients worldwide have already benefited from the therapy.

- ▶ The trio of foundations has been supporting biotech startups with great success thereby making a significant contribution to the growth of the Swiss biotech industry. They share the nomination for the Swiss Biotech Success Stories Award.

- ▶ This transformational joint venture provides Vifor Pharma direct access to dialysis patients, facilitating the product distribution and recruitment for clinical development. It transformed the company from Glattbrugg rapidly into a global nephrology corporation. Such vertical integration is a role model for the convergence of different life science sectors.

Pascale Vonmont

- ▶ For over 25 years, Dr. Pascale Vonmont has been a driving force in advancing innovation and entrepreneurship. As a passionate bridge-builder between science, business, and society, she is committed to accelerating knowledge transfer and ensuring that groundbreaking research translates into real-world applications.

Activen SA

Private company, founded 2010

Member Swiss Biotech Association

Activen – a Remora Venture – is a Swiss biotech company dedicated to the discovery and the marketing of natural miniproteins™ as a new class of actives for the dermo-cosmetic industry.

Key business: R&D, Supplier

Core competencies: Cosmetics & fragrances, Platform technologies, Therapeutics/vaccines (human)

Products, services, technology:

Miniproteins™ are proteins that are small enough to penetrate the skin and offer high and specific efficacy on a given target. They are highly potent and safe, which makes them ideal candidates to become the new generation of active ingredients.

Amphilix AG

Private company, founded 2020

Member Swiss Biotech Association

Amphilix AG is a Basel-based biotech developing next-generation radioligand therapies using a proprietary 3D linker platform and small-molecule ligands. Its clinical-stage lead AMX-0053 targets a protein for colorectal cancer and is ready for First-in-Human imaging. The company seeks CHF 9m Seed.

Key business: R&D

Core competencies: Platform technologies, Therapeutics/vaccines (human)

Products, services, technology: The First-in-Class radioligand differentiates from competition:

- New target, expressed in cancer cells and in tumor-associated growing blood vessels
- Selective small molecule ligand with long residence time on the target
- The specially designed linker defines an excellent in vivo profile

Araris Biotech AG

Private company, founded 2019

Member Swiss Biotech Association

Araris Biotech AG is a spin-off company from the Paul Scherrer Institute (PSI) and ETH Zurich focusing on the commercialization of a novel antibody-drug conjugate (ADC)-linker technology. Araris' innovative platform allows for the attachment of any payload to 'off-the-shelf' antibodies without the need of prior antibody engineering in one-step. In 2025, Taiho Pharmaceutical acquired Araris Biotech.

Key business: R&D

Core competencies: Therapeutics/ vaccines (human)

Products, services, technology:

The resulting ADCs have a well-defined drug-to-antibody ratio, are stable and monomeric. All these favorable properties contribute to the high efficacy, stability and low level of toxicity observed so far. In summary, this approach enables the generation of ADC compounds for the treatment of patients with a high unmet medical need.

BioConcept AG

Private company, founded 1978

Member Swiss Biotech Association

BioConcept is a leading supplier to the research community supporting its customers with a comprehensive and high tech product portfolio of disposables, laboratory equipment, instrumentation and services.

Key business: Distributor, Production, Production (of own products), R&D, Sales & marketing (of own products), Service provider, Supplier

Core competencies: Cell culture, cell technology, Contract manufacturing, Diagnostics, Laboratory equipment & devices, Products, Reagents & (bio) chemicals, Services

Products, services, technology: With our philosophy of being a dedicated 'system supplier', BioConcept supports its customers with a comprehensive product portfolio, supplying reagents, disposables, equipment and instrumentation for applications in the fields of cell biology, molecular biology,

microbiology and immunology.

Bioengineering AG

Private company, founded 1972

Member Swiss Biotech Association

We at Bioengineering AG design and build customized equipment to improve bioproduction efficiency in biotech, novel food, and biopharma plants. Our engineering teams develop reliable bioreactors and fermenters, from lab scale to production, for clients worldwide. Trusted for over 50 years. In 2025 Bioengineering AG was acquired by the Japanese Morimatsu Group.

Key business: Production (of own products), R&D, Sales & marketing (of own products), Service provider, Supplier

Core competencies: Cell culture, cell technology, Laboratory equipment & devices, Production equipment, Products, Project & process management, Services, Therapeutics/vaccines (human), Training & recruiting

Products, services, technology: Engineering & Design

Service: Expert knowledge, servicing, inspection and documentation

Plants: Manufacture of complete bioreactor and fermentor systems

Bioprocess control: automation solutions

Lab- & Pilotfermenters; Hygienic components

CALDRE CALDRE AG

Private company, founded 2025
Member Swiss Biotech Association
CALDRE is a Switzerland based biotech spin-out focussed to revolutionize the way cholestatic-and fibrotic diseases are treated. We develop precise, liver-directed GalNAc-siRNAs to restore bile flow and prevent fibrosis - placing CALDRE in the fast-growing RNA-therapeutics segment of biotech.

Key business: Production (of own products), R&D
Core competencies: Products, Therapeutics/vaccines (human)

Products, services, technology: ClagalsiR is CALDRE's first-in-class GalNAc-siRNA targeting Claudin-3 to restore bile flow and prevent fibrosis. Designed for patients with rare cholestatic liver diseases such as PSC, PBC, it offers a precision RNA approach to halt disease progression and prevent the need for liver transplantation.

CUTISS AG

Private company, founded 2017

Member Swiss Biotech Association

A Swiss life science company, spin-off of UZH, developing personalized skin tissue therapy to treat skin defects and beyond.

Key business: Production, Service provider

Core competencies: Cell culture, cell technology, Medical devices/technologies, Therapeutics/vaccines (human)

Products, services, technology:

CUTISS is the only late-stage clinical TechBio company developing skin tissue therapeutics and dedicated to bioengineering. We are transforming skin surgery with denovoSkin™, our first-in-class personalized tissue therapy that enables automated, on-demand production of living skin at scale.

Developed for patients requiring skin surgery – from massive burns to reconstructive and aesthetic applications – denovoSkin™ has shown long-term safety and efficacy compared to the standard of care.

CYTOSURGE®

CytoSurge AG

Private company, founded 2009

Member Swiss Biotech Association

CytoSurge AG developed FluidFM®, the only technology enabling access, perturbation, and analysis of the same living cell over time. The FluidFM OMNIUM platform allows repeated single-cell biopsies for temporal RNA-seq. The company's CellEDIT service delivers vector-free, precise genome engineering.

Key business: Production, Production (of own products), R&D, Sales & marketing (of own products), Service provider, Supplier

Core competencies: Cell culture, cell technology, Laboratory equipment & devices, Medical devices/technologies

Products, services, technology: The FluidFM OMNIUM platform enables precise, non-destructive single-cell injection and extraction, compatible with RNA analysis and gene editing. Based on FluidFM®, CellEDIT delivers vector-free, stoichiometrically controlled KOs, KIs, and multiplex genome edits -even in hard-to-transfect cells.

FLOBIOTECH

FloBiotech GmbH

Private company, founded 2025

Member Swiss Biotech Association

At FloBiotech, we develop advanced human brain cell models to unlock new therapeutic and diagnostic pathways for neurodegenerative diseases. We address neurodegeneration at its core to enable earlier risk reduction in drug development, improved translational success, and scalable pipeline expansion.

Key business: Production (of own products), R&D, Service provider

Core competencies: Diagnostics, Platform technologies, Therapeutics/vaccines (human)

Products, services, technology:

Our proprietary FloCells™ platform is designed to replicate tau-driven neurodegenerative disease biology, overcoming the limitations of animal models. Partnering with a top US neuroscience university, we are developing a precision therapy that supports the brain's innate ability to manage toxicity.

HBM Partners

HBM Partners AG

Member Swiss Biotech Association

HBM Partners is a Swiss healthcare investor with over \$2.5 billion assets under management. HBM Partners was founded in 2001 with the goal to invest in emerging private and public biopharma and other healthcare companies. HBM Partners is regulated by FINMA and manages SIX listed HBM Healthcare Investments (www.hbmhealthcare.com) and further specialized public and private equity funds.

HBM Partners has a team of over 20 experienced professionals to source, analyze and engage in investments in biopharma, medical devices and diagnostics industries. HBM's investments in private biopharma and healthcare companies have resulted in significant value creation with more than 100 trade sales and IPOs. In private portfolio companies HBM takes an active role and assumes entrepreneurial responsibility together with the management team. HBM is actively looking for further investment opportunities, mainly in later-stage product/drug development and growth companies (including spin-offs and small buyouts). New investments range from \$10 million to \$50 million. Preferred geographies are Western Europe, USA, India and China.

HekeTiss

HekeTiss SA

Private company, founded 2021

Member Swiss Biotech Association

HekeTiss, a UNIGE/HUG spin-off,
enhances lives by pioneering cell-therapy
treatments for ulcerative skin conditions.
Innovating for a healthier tomorrow.

Key business: Production (of own
products), R&D

Core competencies: Cell culture, cell
technology, Therapeutics/vaccines (human)

Products, services, technology:

TrophiPatch, a pioneering off-the-shelf
cell therapy from HekeTiss, offers a
breakthrough in treating chronic wounds,
reducing healing time and costs. Using
modified stem cells from donor fat, it
uniquely accelerates healing by restoring
wound vasculature.

Liventy GmbH

Private company, founded 2014

Liventy merges the best of three different worlds – it is a business incubator, a venture capital advisor, and a market development agency. Our mission is the development and marketing of visionary technologies in Germany, Austria, and Switzerland.

Key business: Financial investor, Service provider

Hauswiese 5, 8133 Esslingen
www.liventy.com

Livinovea GmbH

Private company, founded 2024

Member Swiss Biotech Association

Livinovea is a full-service provider and consultancy for life sciences, specializing in business, operational, and technical excellence. We help companies unlock their potential, identify untapped opportunities, and solve complex challenges, to achieve growth and measurable results.

Key business: Service provider

Core competencies: Business development & strategy, Consulting, Project & process management, Services

Products, services, technology: Business: Strategic growth planning, market positioning, untapped opportunities, roadmap development.

Operations: Value chain process optimization, tech transfer, due diligence, cost reduction.

Technical: Project management, troubleshooting, tech transfer, due diligence, complex challenges.

Private company, founded 2007

Member Swiss Biotech Association

MetrioPharm AG, a clinical stage biopharmaceutical development company based in Zurich with a subsidiary in Berlin, Germany, has developed a platform of small molecule drug candidates (oral and i.v.) which targets the modulation of immune cell metabolism without suppressing the immune system.

Key business: R&D

Core competencies: Products, Therapeutics/vaccines (human)

Products, services, technology:

MetrioPharm's drug candidates have a unique first-in-class self-regulating mechanism of action and have demonstrated broad anti-inflammatory and host-directed anti-infective efficacy with an outstanding safety profile in various preclinical and clinical studies.

Microsynth AG

Private company, founded 1989

Member Swiss Biotech Association

Microsynth (founded in 1989) is a leading European company in nucleic acid synthesis & analysis. The main activities are divided into these business areas: DNA/RNA synthesis - DNA/RNA analysis and sequencing - Contract research/outsourcing.

Key business: Production (of own products), R&D, Sales & marketing (of own products), Service provider, Supplier

Core competencies: Analytical tests & screening, Bioinformatics, Contract manufacturing, Contract R&D, Diagnostics, Products, Reagents & (bio) chemicals, Services

Products, services, technology:

- Oligonucleotides (primers for R&D, ASOs for drug discovery, probes for diagnostics).
- DNA sequencing (Sanger & NGS); Isolation and Assaying (PCR, qPCR, digital PCR, genotyping, etc).
- Contract research (GLP/GMP-compliant assay development, biological testing, CRISPR gene editing analysis, etc).

Phialogics AG

Private company, founded 2023

Member Swiss Biotech Association

Phialogics is a preclinical biotech company specialized in engineering next-generation biologics to rebalance the immune response in acute and chronic inflammation.

Key business: R&D, Sales & marketing (of own products)

Core competencies: Therapeutics/vaccines (human)

Products, services, technology: Phialogics concept is based on the targeted modification of immunoglobulin receptor domains (IgVs) to modulate immune response in inflammatory diseases. Phialogics lead molecules replicate endogenous protein-protein interactions to efficiently modulate the function of their target receptor.

RC TRITEC

Your Tritium Labeling Company

RC Tritec AG

Private company, founded 1934

Member Swiss Biotech Association

RC TRITEC is an established company offering custom synthesis of tritium-labeled compounds, a range of tritiated catalog products, storage service and disposal of radiochemicals. We have over 60 years of experience in the safe handling of tritium gas using in-house developed high-vacuum equipment.

Key business: Production, Production (of own products), R&D, Sales & marketing (of own products), Service provider, Supplier

Core competencies: Analytical tests & screening, Consulting, Contract manufacturing, Contract R&D, Diagnostics, Products, Project & process management, Reagents & (bio)chemicals, Services, Therapeutics/vaccines (veterinary)

Products, services, technology: We produce high-quality tritiated molecules using state-of-the-art technologies. Our capabilities span precursor-dependent strategies including dehalogenation, Olefin hydrogenation, Carbonyl reduction and methylation as well as advanced direct

hydrogen-isotope exchange employing transition metals.

Connecting Life Science Innovation With a Global Audience.

We combine strategic communication and marketing with the power of leading life science media brands.

Built on
experience.

**Focused on
what's next.**

SWISS+ BIOTECH™

Collaborate with us and use the power
of our networking platforms

Onsite networking

Join the yearly Swiss Biotech Day for networking at the premier global biotechnology conference

Brand promotion

Unlock business opportunities by listing your company in our Swiss Biotech Directory

Financing and Partnering

Utilize our Swiss Biotech Ventures platform to engage with Swiss-based R&D biotech companies

Talent search

International talent is matched with job opportunities in Switzerland on our Swiss Biotech Orbit platform

Professional development and education

Find a perfect mix of education on a professional level at the Swiss Biotech Association Academy

International collaboration

Our Global Village connects foreign biotech hubs with the Swiss biotech ecosystem for lasting business ties

Join the Swiss Biotech Association

1 Nation 1 Biotech Cluster
